

2022 AT A GLANCE...

425 Consultations provided

205 Evaluations provided

25 Monthly parent-child classes

256 Children & families enrolled in **Early Learning** programs

403 Children & families served in the **Early Support** program

4305
Total Early Support Visits

42%

of children who are graduating or leaving program in typical developing range/not needing additional services

82%

of a child's adult brain is formed by the time they are 2 years old

0-3

are the most important years for lifelong mental health and well being

THE RESULTS OF OUR SERVICES:

- **Improved social and emotional development** involving children's awareness of their own and others' emotions, how to share and take turns, and how to make and maintain friendship
- **Improved cognitive development**, including how to communicate needs and emotions, acquisition of early literacy and math skills, and gaining strategies for problem solving
- **Improved relationship between parent and child**, an increase in parent's understanding and support of their child's strengths, challenges, and how to better advocate for their needs, and higher levels of healthy attachment
- **Improved physical development** providing the basis for maturation, coordination, and positive growth in all other areas
